TECH RIDER/ REQUESTS

Stage

Minimum of 15' x 15' clean, clear, level space with no obstructions, and no overhead obstacles (e.g. chandelier) lower than 15' above the stage.

Sound

We will provide: microphone and loop pedal. Music for acts will be sent via email as mp3s to tech crew beforehand.

You will provide a small table, mic stand and D.I. box, down stage right.

Lighting

A general wash of lighting in order to see is needed. Some backlighting is useful, with no bare, harsh light aimed directly from the front (depending on act).

Dressing Room/ Green Room

A clean, secure space to change, warm-up, and keep personal items in is required. Two chairs and a small table are appreciated. If the dressing room is too small for warming up, access to the stage area or other space is needed for safety.

*Note: If there are any questions about equipment needs/ usage, please don't hesitate to contact us!
